"Rock Talks"

If you love fossils, rocks, and history this activity is for you! As you have hopefully already discovered in our Pioneer Museum, Blue Licks is an amazing place for a geology program and some awesome specimens have been found in this area. The main emphasis of this program is the Ordovician period. Park visitors will certainly find this interesting and informative regardless of their current knowledge and experience. Join our Park Naturalist to learn more about the incredible geology of the Blue Licks area.
